For fences (glass or ornamental), once connected, you just need to create a new plan.

The steps are really simple

STEP 1

Choose the type of project and the number of sides. For example :

1 right angle even if with single or double door = 1 side / L-shaped = 2 sides / Rectangle = 4 sides / Pentagon = 5 sides

Then you enter the lengths for EACH of the sides*. The builder assumes that the sides are touching and takes into account that the panels must stop corner to corner in the case of a glass project.

SPECS & ADD-ONS

← Back to the previous step

SIDE 01

SIDE 02

SIDE 03

Unit	Span Length	Left nosing ?	Right nosing ?	Unit Converter			
Metric					=		
☒ No Door ☐ Single Door ☐ Double Door		Perforated panel (left)	Perforated panel (right)	Product priority			
FLIP HINGE ← MOVE LEFT MOVE RIGHT →		<input 11."="" type="text" value="300 mm hinged panel (46" ×=""/>	<input 11."="" type="text" value="300 mm hinged panel (46" ×=""/>	No priority			

- It is important that all sides are completed in order to proceed to the next step!

If the lengths are the exact dimension to be covered, you must enter -57 and -57 in the “Nose on the left” and “Nose on the right” boxes.

SIDE 01

SIDE 02

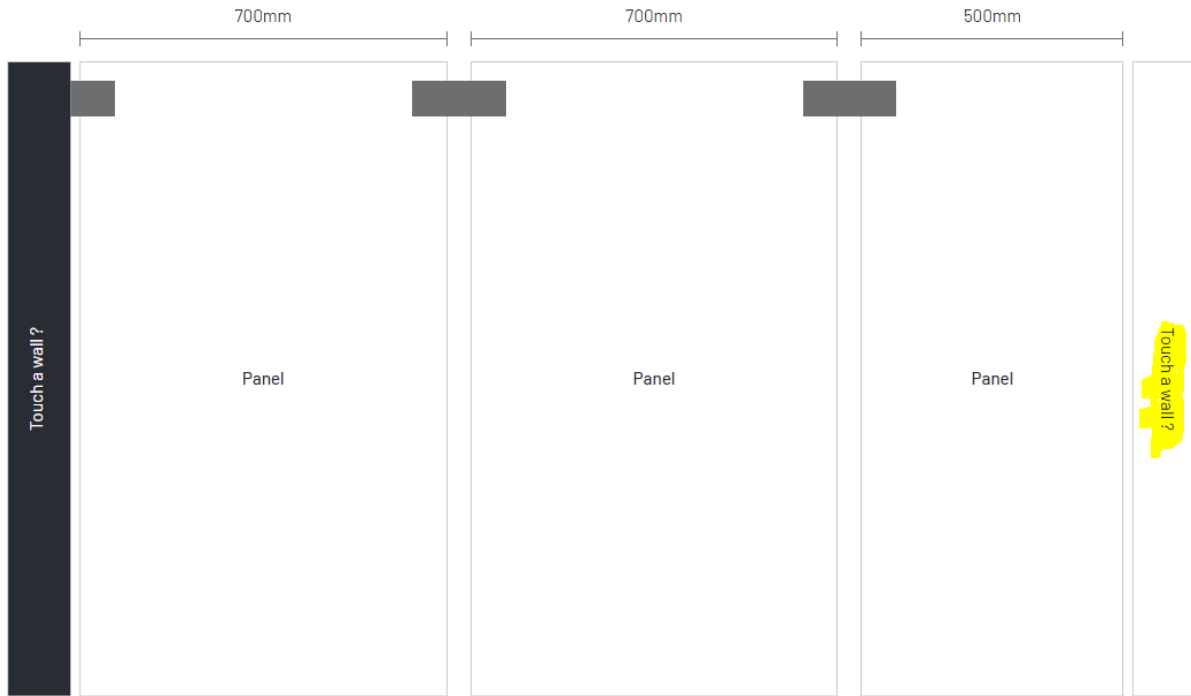

SIDE 03

Unit	Span Length	Left nosing ?	Right nosing ?	Unit Converter			
Metric	1500	-57	-57		=		
☒ No Door ☐ Single Door ☐ Double Door		Perforated panel (left)	Perforated panel (right)	Product priority			
FLIP HINGE ← MOVE LEFT MOVE RIGHT →		<input 11."="" type="text" value="300 mm hinged panel (46" ×=""/>	<input 11."="" type="text" value="300 mm hinged panel (46" ×=""/>	No priority			

If you want a door with a glass project, choose the 900 mm hinge panel for more robustness.

Unit	Span Length	Left nosing ?	Right nosing ?	Unit Converter			
Metric	8000	-57	-57		=		
☐ No Door ☒ Single Door ☐ Double Door		Perforated panel (left)	Perforated panel (right)	Product priority			
FLIP HINGE ← MOVE LEFT MOVE RIGHT →		<input 35."="" type="text" value="900mm hinged panel (46" ×=""/>	<input 11."="" type="text" value="300 mm hinged panel (46" ×=""/>	No priority			

You can specify whether your side should attach to the wall. Just press the button "Touch a wall?"

STEP 2

For the glass:

If you want to add corners or wall ties. Do not forget to add the “corner(s)” according to your needs. You may decide to add wall ties for extra strength.

For ornamental:

You must choose the type of posts you want (in the ground or with plates).

If your sides are independent, you will need to add a 2 ½" post for each of these sides! ** the planner includes 2 ½" posts for corners and doors, and 2" posts between panels.

STEP 3

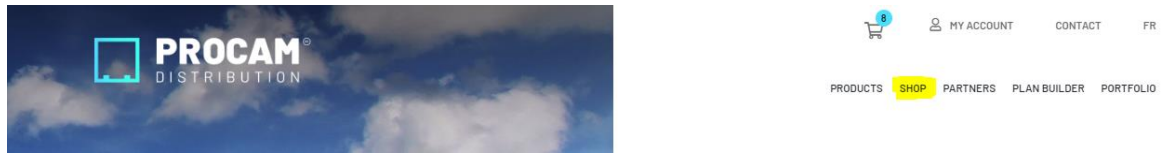

Visual result of the plan

STEP 4

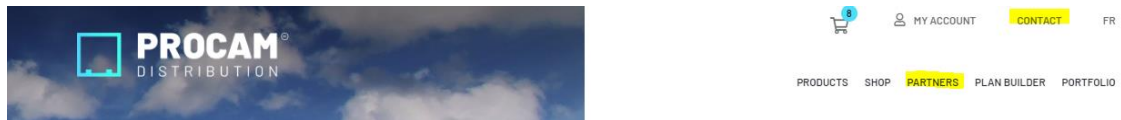

Price before taxes and delivery

- Ability to add your documents
- Save your plan
- Print your plan
- Add everything to the basket to place the order and/or find out the exact price with taxes and delivery. ** important to validate the delivery address. The postal code defines the delivery cost.
